

# Contents

- Al-Hasani H, Jaenicke L: Characterization of the sex-inducer glycoprotein of *Volvox carteri* f. *weismannia* 8  
Ascher PD → Pomper KW
- Barnabás B, Kovács G: In vitro pollen maturation and successful seed production in detached spikelet cultures in wheat (*Triticum aestivum* L.) 286  
Barone A, Del Giudice A, Ng NY: Barriers to interspecific hybridization between *Vigna unguiculata* and *Vigna vexillata* 195  
Béclin C, Botton E, Boudiard L, Charlot F, Doré C: Gamma irradiation of the female gametophyte in cabbage (*Brassica oleracea* L.) 280  
Bino RJ → Booy G  
Booy G, Krens FA, Bino RJ: Analysis of pollen-tube growth in cultured maize silks 227  
Botton E → Béclin C  
Boudiard L → Béclin C
- Calzoni GL → Speranza A  
Carafa AM, Carratu' G, Pizzolongo P: Anatomical observations on the nucellar apex of *Wellwitschia mirabilis* and the chemical composition of the micropylar drop 275  
Carratu' G → Carafa AM  
Carroll SB → Mulcahy DL  
Charlot F → Béclin C  
Chaubal R, Reger BJ: Calcium in the synergid cells and other regions of pearl millet ovaries 34  
Chaubal R, Reger BJ: The dynamics of calcium distribution in the synergid cells of wheat after pollination 206  
Chaubal R → Reger BJ  
Chaubal R → Reger BJ  
Cismondia IA → Noher de Halac I  
Coetzer LA → De Frey HM  
Cresti M → Huang B-Q  
Cresti M → Theunis CH
- De Frey HM, Coetzer LA, Robbertse PJ: A unique anther-mucilage in the pollination biology of *Tylosema esculentum* 298  
Del Giudice A → Barone A  
Doré C → Béclin C
- Erdelská O, Vidovencová Z: Cleavage polyembryony in maize 224
- Fama G → Noher de Halac I  
Feijó JA, Malhó R, Pais MSS: A cytochemical study of the role of ATPases during pollen germination in *Agapanthus umbellatus* L'Her 138  
Feijó JA → Malhó R  
Franklin FCH → Franklin-Tong VE  
Franklin-Tong VE, Franklin FCH: Gametophytic self-incompatibility in *Papaver rhoeas* L. 1
- Garrido D → Žárský V  
Groot PFM de → Van Herpen MMA
- Heberle-Bors E → Žárský V  
Heslop-Harrison J, Heslop-Harrison Y: Intracellular motility, the actin cytoskeleton and germinability in the pollen of wheat (*Triticum aestivum* L.) 247  
Heslop-Harrison Y → Heslop-Harrison J  
Hesse M → Schlag M  
Heuvel KJPT van den → Van Herpen MMA  
Hoover EE → Pomper KW  
Huang BQ, Russell SD: Synergid degeneration in *Nicotiana*: a quantitative, fluorochromatic and chlorotetracycline study 151  
Huang B-Q, Pierson ES, Russell SD, Tiezzi A, Cresti M: Video microscopic observations of living, isolated embryo sacs of *Nicotiana* and their component cells 156
- Installé P → Ye D
- Jacobs M → Ye D  
Jaenicke L → Al-Hasani H  
Jenner C → Wunnachit W  
Jensen WA → Wetzel CLR
- Kandasamy MK → Nishio T  
Kao T → Tsai D-S  
Kesseli R → Mulcahy DL  
Kojima A, Nagato Y: Diplosporous embryo-sac formation and the degree of diplospory in *Allium tuberosum* 72  
Kojima A, Nagato Y: Pseudogamous embryogenesis and the degree of parthenogenesis in *Allium tuberosum* 79  
Kovács G → Barnabás B  
Kreiling KM → Tsai D-S  
Krens FA → Booy G
- Lee H-S → Tsai D-S  
Liu B → Palevitz BA  
Lyakh VA: Competence of the pollen of wild species and the cultivar of tomato to affect fertilization at low temperature 128
- Malhó R, Pais MSS: Kinetics and hydrodynamics of *Agapanthus umbellatus* pollen-tube growth: a structural and stereological study 163  
Malhó R, Feijó JA, Pais MSS: Effect of electrical fields and external ionic currents on pollen-tube orientation 57  
Malhó R → Feijó JA  
Morningstar PA → Southworth D  
Mulcahy DL, Weeden NF, Kesseli R, Carroll SB: DNA probes for the Y-chromosome of *Silene latifolia*, a dioecious angiosperm 86
- Nagato Y → Kojima A  
Nagel J → Spangenberg G
- Nasrallah JB → Nishio T  
Nasrallah ME → Nishio T  
Negrutu I → Ye D  
Ng NY → Barone A  
Nguyen Thi BN, Turian G: Actin stringently accumulated in the specifically positioned, differentiating female gametangia of *Allomyces* 310  
Nishio T, Toriyama K, Sato T, Kandasamy MK, Paolillo DJ, Nasrallah JB, Nasrallah ME: Expression of S-locus glycoprotein genes from *Brassica oleracea* and *B. campestris* in transgenic plants of self-compatible *B. napus* cv Westar 101  
Noher de Halac I, Fama G, Cismondia IA: Changes in lipids and polysaccharides during pollen ontogeny in *Oenothera* anthers 110
- Oliveira MM → Spangenberg G  
Osusky M → Spangenberg G
- Pais MSS → Feijó JA  
Pais MSS → Malhó R  
Pais MS → Spangenberg G  
Palevitz BA, Liu B: Microfilaments (F-actin) in generative cells and sperm: an evaluation 89  
Paolillo DJ → Nishio T  
Pérez Vicente R → Spangenberg G  
Pierson ES → Huang B-Q  
Pierson ES → Theunis CH  
Pizzolongo P → Carafa AM  
Pomper KW, Hoover EE, Ascher PD: DNA content of *Phaseolus coccineus* × *P. vulgaris* suspensors 146  
Post LC → Tsai D-S  
Potrykus I → Spangenberg G  
Pressey R → Reger BJ
- Reger BJ, Chaubal R, Pressey R: Chemotropic responses by pearl millet pollen tubes 47  
Reger BJ, Pressey R, Chaubal R: In vitro chemotropism of pearl millet pollen tubes to stigma tissue: a response to glucose produced in the medium by tissue-bound invertase 201  
Reger BJ → Chaubal R  
Říhová L → Žárský V  
Robbertse PJ → De Frey HM  
Russell SD → Huang B-Q  
Russell SD → Yu H-S
- Sato T → Nishio T  
Schlag M, Hesse M: The formation of the generative cell in *Polystachia pubescens* (Orchidaceae) 131  
Schrauven JAM → Van Herpen MMA  
Sedgley M → Wunnachit W  
Shore JS → Wolfe LM  
Southworth D, Morningstar PA: Isolation of generative cells from pollen of *Phoenix dactylifera* 270  
Spangenberg G, Pérez Vicente R, Oliveira

- MM, Osusky M, Nagel J, Pais MS, Potrykus I: CMS system in *Nicotiana*: flower development, patterns of mitochondrial DNA and mitochondrial gene expression. I. Analysis of parental *Nicotiana* species and alloplasmic cms analogs of tobacco 13
- Speranza A, Calzoni GL: Inhibition of pollen-tube growth and protein secretion by the monovalent ionophore monensin 232
- Theunis CH, Pierson ES, Cresti M: The microtubule cytoskeleton and the rounding of isolated generative cells of *Nicotiana tabacum* 64
- Tiezzi A → Huang B-Q
- Tirlapur UK, Willemse MTM: Changes in calcium and calmodulin levels during microsporogenesis, pollen development and germination in *Gasteria verrucosa* (Mill.) H. Duval 214
- Toriyama K → Nishio T
- Tsai D-S, Lee H-S, Post LC, Kreiling KM, Kao T: Sequence of an S-protein of *Lycopersicon peruvianum* and comparison with other solanaceous S-proteins 256
- Tupý J → Žárský V
- Turian G → Nguyen Thi BN
- Van Herpen MMA, Groot PFM de, Schrauwen JAM, Heuvel KJPT van den, Weterings KAP, Wullems GJ: In-vitro culture of tobacco pollen: gene expression and protein synthesis 304
- Vicento O → Žárský V
- Vidovencová Z → Erdelská O
- Weeden NF → Mulcahy DL
- Weterings KAP → Van Herpen MMA
- Wetzel CLR, Jensen WA: Studies of pollen maturation in cotton: the storage reserve accumulation phase 117
- Willemse MTM → Tirlapur UK
- Wolfe LM, Shore JS: The mating system of *Hydrophyllum appendiculatum*, a protandrous species 239
- Wu Y → Ye D
- Wullems GJ → Van Herpen MMA
- Wunnachit W, Jenner C, Sedgley M: Pollen vigour and composition in relation to andromonoecy in cashew (*Anacardium occidentale* L.: Anacardiaceae) 264
- Ye D, Wu Y, Installé P, Jacobs M, Negrutiu I: On the genetic control of the regeneration response in the dioecious *Melandrium album* 292
- Yu H-S, Russell SD: Male cytoplasmic diminution and male germ unit in young and mature pollen of *Cymbidium goeringii*: a 3-dimensional and quantitative study 169
- Žárský V, Garrido D, Říhová L, Tupý J, Vicente O, Heberle-Bors E: Derepression of the cell cycle by starvation is involved in the induction of tobacco pollen embryogenesis 189
- Zee SY: Confocal laser scanning microscopy of microtubule organizational changes in isolated generative cells of *Allemanda neriifolia* during mitosis 182
- Zee SY: Ultrastructure and microtubule organization of isolated generative cells of *Allemanda neriifolia* at interphase and prophase 27
